SCB GLOBAL
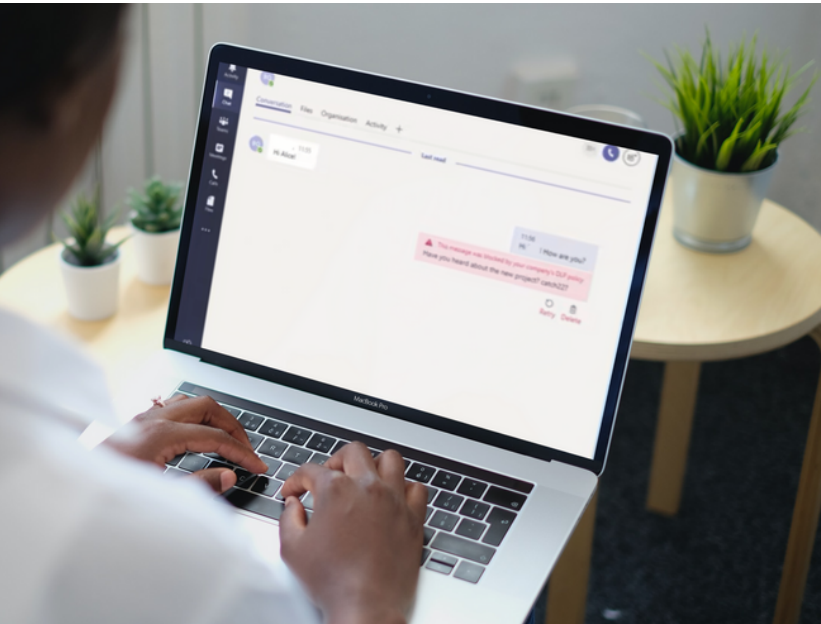

OPTO SHIELD

Inline Real-time DLP:

Real-time control for the everywhere enterprise

OPTOShield a market leader when it comes to Real-Time DLP inspection.

OPTOShield can block or mask all data that is defined as sensitive in real time, before arriving to its destination.

Offers a built-in DLP engine.

Has unique capabilities to handle both messages and files as well as audio and video.

OPTOShield Advantages

→ Prevention of data leaks.

→ Internal risk mitigation.

→ Addresses many important limitations of Microsoft's DLP solution.

→ Address end-user unawareness and control what they can share and with whom.

→ DLP inspection can be done by utilizing existing DLP infrastructures of leading vendors.

SCB GLOBAL

OPTO SHIELD

Taking control with **OPTOShield's** Ethical Wall

Control who can communicate with whom

- Federation with external users/guests.

- Internal communication between different AD/AAD groups/users/domains/Teams.

Control specific collaboration options

What features does the Ethical Wall have?

- Covers all Microsoft Teams scopes: chat, teams & channels and meetings

- Notifications – popups and in-context

- Auditing and reports for training and awareness

- Works like a firewall – scans policies from top to bottom

SCBGLOBAL

OPTO SHIELD

Archive and eDiscovery:
Compliance archive - Search and export information easily and fast

What is it?
OPTOShield helps you to meet GDPR and compliance requirements with a full on-cloud or on-prem data dashboard independent of O365. Easily integrated with existing eDiscovery and archiving solutions.

- Advanced search by text, user, dates and more

- Archive data on cloud or on site

- Integrate with existing eDiscovery systems

- Search for personal information and export user data

- See message context in incidents

- Support files and messages

Channel Management for OPTOShield

The only solution in the market capable to deal with the most solicited requirement for Microsoft Teams: Archive, Export, Move, Copy & Merge Channels. Remove the clutter, increase productivity, archive everything. Channel Management helps your Microsoft Teams environment evolve with your changing business.

OPTO SHIELD

Recording AI Compliance Analysis:
Audio and video analysis for DLP and eDiscovery needs

What can users expect?

OPTOShield transcribes in near-real time audio and video for DLP and eDiscovery purposes. Users can get an in-depth analysis that includes detection of named entities, emotions, sentiments, automatic scene generation, labels and keywords.

What can users do?

Analyse on-screen video with OCR, search meeting content using eDiscovery, inspect meeting audio & video by DLP policies, enforce company policies on meeting attendees and many more features.

Features of Recording AI Compliance Analysis

Enforce recordings based on flexible policies; meeting eDiscovery - make meeting searchable by many parameters; automatically inspect meeting content by DLP and Ethical Wall policies; transcript of all users meeting audio; on-prem storage of audio/video recordings and integrated with leading DLP vendors.

SCB GLOBAL

OPTO SHIELD

OPTOShield's Risk Engine -
Geofencing and user and entity user behaviour (UEBA)
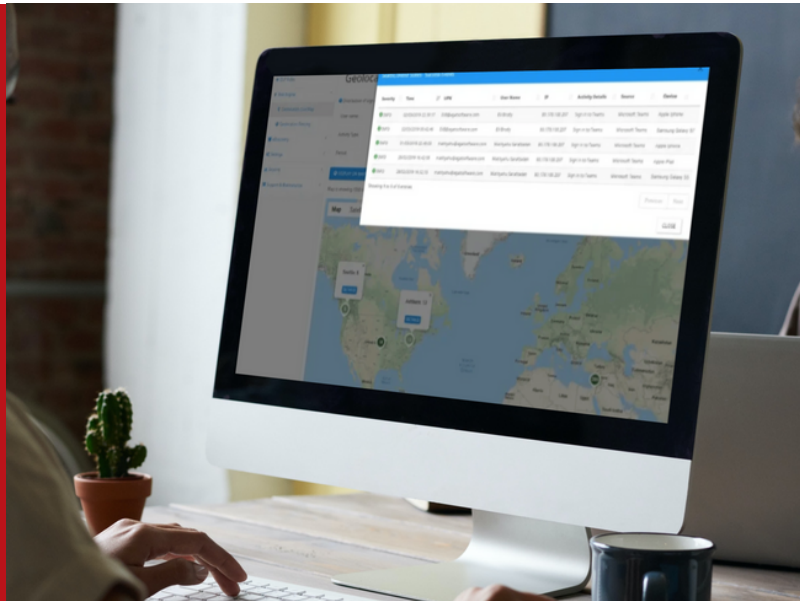

OPTOShield solution specialising to limit threats and risks

Geofencing

- Set Geofencing rules based on groups, domains or users.
- Allow, block or monitor access from specific countries.

User Entity Behavior Analytics - UEBA

- Profile Microsoft Teams usage (messages, files, hours, devices, IP etc).
- Detect anomaly.
- Create and handle security events.

Eg. Location change / impossible traveller and large data consumptions.
